INDEX OF SUBJECTS AND AUTHORS

Absorption of calcium, The alimentary, and its deposition in the tissues in experimental tuberculosis. Studies on the biochemistry and chemotherapy of tuberculosis. XXIV, 1

Activity in tuberculosis, Wildbolz auto-urine test for, The, 318

Alimentary absorption of calcium and its deposition in the tissues in experimental tuberculosis, The. Studies on the biochemistry and chemotherapy of tuberculosis. XXIV, 1

Alkali reserve in tuberculosis, The, 193

America, tuberculosis work in, The future of: presidential address, 215

Antiformin, A comparison of the sodium hydroxide and, methods for cultivating tubercle bacilli, 332

Apical tuberculosis, 120

ARONSON, JOSEPH D., AND LEWIS, PAUL A. The standardization of tuberculin, 404

Artificial pneumothorax, selective collapse in, So called: a plea for low intrapleural pressures, 291

Auto-urine reaction, Wildbolz, The: a report of seventy-five cases, 325

—— test, Wildbolz, for activity in tuberculosis, The, 318

Bacilli, tubercle, chemistry of, The, 285

——, ——, grass and colon, Tissue changes produced by the action of the lipins of, and of liver. Studies on the biochemistry and chemotherapy of tuberculosis. XXV, 88

——, ——, sodium hydroxide and antiformin methods for cultivating, A comparison of the, 332

BARKUS, O. Demineralization in tuberculosis: distribution of calcium in the tuberculous guinea pig, 111

BARNES, HARRY LEE. The X-ray in the diagnosis of pulmonary tuberculosis: a comparison of X-ray and physical signs in 1000 cases, 202

Bile obtained through the duodenal tube, The diagnosis of doubtful cases of tuberculosis by the examination of, 174.

Biochemistry and chemotherapy of tuberculosis, Studies on the. XXIV. The alimentary absorption of calcium and its deposition in the tissues in experimental tuberculosis, 1

—— —— —— —— ——, —— —— ——. XXV. Tissue changes produced by the action of the lipins of tubercle, grass and colon bacilli, and of liver, 88

—— —— —— —— ——, —— —— ——. XXVI. Fat-splitting ferments in lymphocytes, 105

BLACK, LOUISA T., AND FREED, HAROLD. The diagnosis of doubtful cases of tuberculosis by examination of bile obtained through the duodenal tube, 174

Blood, lipoids and enzymes of the, in pulmonary tuberculosis, The, 278

Body cells in tuberculosis, Some of the more fundamental reactions of the, 389

BROWN, ELMER B., AND JOHNSON, TREAT B. The chemistry of tubercle bacilli, 285

BROWN, LAWRASON. The future of tuberculosis work in America: presidential address, 215

BROWN, ORVILLE HARRY. Apical tuberculosis, 120

Calcium, alimentary absorption of, The, and its deposition in the tissues in experimental tuberculosis. Studies on the biochemistry and chemotherapy of tuberculosis. XXIV, 1

Calcium in the tuberculous guinea pig, distribution of: Demineralization in tuberculosis, 111

Capacity, vital, of the lungs, A method for quickly obtaining the percentage of an individual's theoretical normal. Studies on the respiratory organs in health and disease. VIII, 161

Carborundum inhalation, The relatively early lesions in experimental pneumokoniosis produced by, and their influence on pulmonary tuberculosis. Studies on the relation of mineral dusts to tuberculosis. III, 344

Care, Corporation, of tuberculous employees: an experiment as carried out in Colfax by a large corporation, 133

Case of closed tuberculous pyopneumothorax treated by formaldehyde-glycerine injections with recovery, A, 62

—— —— diabetes complicating chronic pulmonary tuberculosis treated with insulin, A, 386

—— —— primary lower lobe tuberculosis, A, with onset of activity immediately after prophylactic typhoid inoculation, 60

Cauterization: its effect upon cutaneous tuberculous lesions and the dissemination of tuberculosis in the guinea pig, 358

Cells, body, in tuberculosis, Some of the more fundamental reactions of the, 389

Chaulmoogra oil esters in the treatment of pulmonary tuberculosis, 257

Chemistry of tubercle bacilli, The, 285

Chemotherapy of tuberculosis, Studies on the biochemistry and. XXIV. The alimentary absorption of calcium and its deposition in the tissues in experimental tuberculosis, 1

—— —— ——, —— —— —— —— ——. XXV. Tissue changes produced by the action of the lipins of tubercle, grass and colon bacilli, and of liver, 88

—— —— ——, —— —— —— —— ——. XXVI. Fat-splitting ferments in lymphocytes, 105

Children discharged from tuberculosis sanatoria, The subsequent history of, 207

Christian Saugman, 1864–1923, 373

Chronic miliary pulmonary tuberculosis of low virulence, 370

—— pulmonary tuberculosis, A case of diabetes complicating, treated with insulin, 386

Clapp, C. A. Tuberculosis of the eye and its treatment: a review of recent literature, 81

Clinical study of the gassed ex-soldier with special reference to pulmonary tuberculosis, A, 230

Closed tuberculous pyopneumothorax, A case of, treated by formaldehyde-glycerine injections with recovery, 62

Codliver oil in experimental tuberculosis, value of, The effect of the fat-soluble A vitamine on tuberculosis of the guinea pig, with especial reference to the. Studies on nutrition in experimental tuberculosis. I, 33

Cole, Hermon Harrison. A clinical study of the gassed ex-soldier with special reference to pulmonary tuberculosis, 230

Colfax, an experiment as carried out in, by a large corporation: Corporation care of tuberculous employees, 133

Colon bacilli, Tissue changes produced by the action of the lipins of tubercle, grass and, and of liver. Studies on the biochemistry and chemotherapy of tuberculosis. XXV, 88

Colorado, tuberculosis mortality in, for the thirteen years, 1908 to 1920, A statistical study of, 445

Comparison of the sodium hydroxide and antiformin methods for cultivating tubercle bacilli, A, 332

—— —— X-ray and physical signs in 1000 cases, a: The X-ray in the diagnosis of pulmonary tuberculosis, 202

Complex, primary, in human tuberculosis and its significance, The, 314

Corper, H. J., and Lurie, Max B. Cauterization: its effect upon cutaneous tuberculous lesions and the dissemination of tuberculosis in the guinea pig, 358

Corporation care of tuberculous employees: an experiment as carried out in Colfax by a large corporation, 133
CREEL, ERCHAL, AND HART, A. L. A case of diabetes complicating chronic tuberculosis treated with insulin, 386
Cultivating tubercle bacilli, sodium hydroxide and antiformin methods for, A comparison of the, 332
Cutaneous tuberculous lesions and the dissemination of tuberculosis in the guinea pig, Cauterization: its effect upon, 358

Demineralization in tuberculosis: distribution of calcium in the tuberculous guinea pig, 111
Diabetes complicating chronic pulmonary tuberculosis treated with insulin, A case of, 386
—— severe, complicated by severe tuberculosis, The treatment of, with insulin, 375
Diagnosis, differential, of tuberculosis versus hyperthyroidism, Some remarks on the, 186
—— of doubtful cases of tuberculosis by examination of bile obtained through the duodenal tube, The, 174
—— —— pulmonary tuberculosis, The X-ray in the: a comparison of X-ray and physical signs in 1000 cases, 202
Diets, Experimental tuberculosis in rats on varied, 49
Differential diagnosis of tuberculosis versus hyperthyroidism, Some remarks on the, 186
Dish towel as a source of tuberculous infection, The, 117
Dissemination of tuberculosis in the guinea pig, Cauterization: its effect upon cutaneous tuberculous lesions and the, 358
Distribution of calcium in the tuberculous guinea pig: Demineralization in tuberculosis, 111
Doubtful cases of tuberculosis, diagnosis of, The, by examination of bile obtained through the duodenal tube, 174
Duodenal tube, bile obtained through the, The diagnosis of doubtful cases of tuberculosis by the examination of, 174
Dusts, mineral, relation of, to tuberculosis, Studies on the. III. The relatively early lesions in experimental pneumokoniosis produced by carborundum inhalation and their influence on pulmonary tuberculosis, 344

Early tuberculous processes. The reticulum of the lung. I. Its relation to, 141
Effect of the fat-soluble A vitamine on tuberculosis of the guinea pig, with especial reference to the value of cod-liver oil in experimental tuberculosis, The. Studies on nutrition in experimental tuberculosis. I, 33
Employees, tuberculous, Corporation care of: an experiment as carried out in Colfax by a large corporation, 133
Enzymes, lipoids and, of the blood in pulmonary tuberculosis, The, 278
Erythrocytes, suspension stability rate of, in pulmonary tuberculosis, The, 264
Experimental tuberculosis in rats on varied diets, 49
—— ——, nutrition in, Studies on. I. The effect of the fat soluble A vitamine on tuberculosis of the guinea pig, with especial reference to the value of codliver oil in experimental tuberculosis, 33
—— ——, The alimentary absorption of calcium and its deposition in the tissues in. Studies on the biochemistry and chemotherapy of tuberculosis. XXIV, 1
Ex-soldier, gassed, A clinical study of the, with special reference to pulmonary tuberculosis, 230
Eye, Tuberculosis of the, and its treatment: a review of recent literature, 81
——, —— —— ——, The nature of, 67

Fat-soluble A vitamine, The effect of the, on tuberculosis of the guinea pig, with especial reference to the value of codliver oil in experimental tuberculosis.

Studies on nutrition in experimental tuberculosis. I, 33

Fat-splitting ferments in lymphocytes. Studies on the biochemistry and chemotherapy of tuberculosis. XXVI, 105

Ferments, Fat-splitting, in lymphocytes. Studies on the biochemistry and chemotherapy of tuberculosis. XXVI, 105

FINNOFF, WILLIAM C. The nature of tuberculosis of the eye, 67

FLOYD, CLEAVELAND, AND SIKORSKY, L. The dish towel as a source of tuberculous infection, 117

Formaldehyde-glycerine injections, A case of closed tuberculous pyopneumothorax treated by, with recovery, 62

FREED, HAROLD, AND BLACK, LOUISA T. The diagnosis of doubtful cases of tuberculosis by examination of bile obtained through the duodenal tube, 174

Fundamental reactions of the body cells in tuberculosis, Some of the more, 389

Future of tuberculosis work in America, The: presidential address, 215

GARDNER, LEROY U. Studies on the relation of mineral dusts to tuberculosis. III. The relatively early lesions in experimental pneumokoniosis produced by carborundum inhalation and their influence on pulmonary tuberculosis, 344

Gassed ex-soldier, A clinical study of the, with special reference to pulmonary tuberculosis, 230

GHON, ANTON. The primary complex in human tuberculosis and its significance, 314

Grass and color bacilli, Tissue changes produced by the action of the lipins of tubercle, and of liver. Studies on the biochemistry and chemotherapy of tuberculosis. XXV, 88

Guinea pig, cutaneous tuberculous lesions and the dissemination of tuberculosis in the, Cauterization: its effect upon, 358

Guinea pig, tuberculosis of the. The effect of the fat-soluble A vitamine on, with especial reference to the value of cod-liver oil in experimental tuberculosis. Studies on nutrition in experimental tuberculosis. I, 33

——, tuberculous, distribution of calcium in the: Demineralization in tuberculosis, 111

HART, A. L., AND CREEL, ERCHAL. A case of diabetes complicating chronic pulmonary tuberculosis treated with insulin, 386

HAYMAN, J. M., JR. The Wildbolz autourine reaction: a report of seventy-five cases, 325

HENNELL, HERMAN, AND STIVELMAN, BARNET P. So called selective collapse in artificial pneumothorax: a plea for low intrapleural pressures, 291

History, subsequent, of children discharged from tuberculosis santoria, The, 207

Human tuberculosis, The primary complex in, and its significance, 314

Hyperthyroidism, differential diagnosis of tuberculosis versus, Some remarks on the, 186

Immunological studies in tuberculosis, 412

Infection, tuberculous, The dish towel as a source of, 117

Insulin, A case of diabetes complicating chronic pulmonary tuberculosis treated with, 386

——, The treatment of severe diabetes complicated by severe tuberculosis with, 375

Intrapleural pressures, low, a plea for: So called selective collapse in artificial pneumothorax, 291

JOHNSON, TREAT B., AND BROWN, ELMER B. The chemistry of tubercle bacilli, 285

KAHN, I. S. A case of closed tuberculous pyopneumothorax treated by formaldehyde-glycerine injections with recovery, 62

KAHN, I. S. A case of primary lower lobe tuberculosis, with onset of activity immediately after prophylactic typhoid inoculation, 60

——, ——. ——. Chronic miliary pulmonary tuberculosis of low virulence, 370

KORNS, JOHN H. The Wildbolz autourine test for activity in tuberculosis, 318

LAIRD, ARTHUR T. The subsequent history of children discharged from tuberculosis sanatoria, 207

LANGE, LINDA B., AND SIMMONDS, NINA. Experimental tuberculosis in rats on varied diets: protein and salt factors, 49

LEVINSON, S. A. The suspension stability rate of erythrocytes in pulmonary tuberculosis, 264

——, ——. ——., AND PETERSEN, WILLIAM F. The lipoids and enzymes of the blood in pulmonary tuberculosis, 278

LEWIS, PAUL A. AND ARONSON, JOSEPH D. The standardization of tuberculin, 404

Lipins of tubercle, grass and colon bacilli, and of liver, Tissue changes produced by the action of the. Studies on the biochemistry and chemotherapy of tuberculosis. XXV, 88

Lipoids and enzymes of the blood in pulmonary tuberculosis, The, 278

LISSNER, HENRY H. Chaulmoogra oil esters in the treatment of pulmonary tuberculosis, 257

Liver, lipins of tubercle, grass and colon bacilli, and of, Tissue changes produced by the action of the. Studies on the biochemistry and chemotherapy of tuberculosis. XXV, 88

Low intrapleural pressures, a plea for: So called selective collapse in artificial pneumothorax, 291

—— virulence, Chronic miliary pulmonary tuberculosis of, 370

Lower lobe pulmonary tuberculosis, 307

—— —— tuberculosis, primary, A case of, with onset of activity immediately after prophylactic typhoid inoculation, 60

Lung, The reticulum of the. I. Its relation to early tuberculous processes, 141

Lungs, vital capacity of the, A method for quickly obtaining the percentage of an individual's theoretical normal. Studies on the respiratory organs in health and disease. VIII, 161

LURIE, MAX B. A comparison of the sodium hydroxide and antiformin methods for cultivating tubercle bacilli, 332

——, —— ——., AND CORPER, H. J. Cauterization: its effect upon cutaneous tuberculous lesions and the dissemination of tuberculosis in the guinea pig, 358

Lymphocytes, Fat-splitting ferments in. Studies on the biochemistry and chemotherapy of tuberculosis. XXVI, 105

MAVER, MARY E., AND WELLS, H. GIDEON. Studies on the biochemistry and chemotherapy of tuberculosis. XXIV. The alimentary adsorption of calcium and its deposition in the tissues in experimental tuberculosis, 1

Method for quickly obtaining the percentage of an individual's theoretical normal vital capacity of the lungs, A. Studies on the respiratory organs in health and disease. VIII, 161

Methods for cultivating tubercle bacilli, A comparison of the sodium hydroxide and antiformin, 332

MIDDLETON, WILLIAM S. Lower lobe pulmonary tuberculosis, 307

Miliary pulmonary tuberculosis of low virulence, Chronic, 370

MILLER, WILLIAM SNOW. The reticulum of the lung. I. Its relation to early tuberculous processes, 141

Mineral dusts, relation of, to tuberculosis, Studies on the. III. The relatively early lesions in experimental pneumokoniosis produced by carborundum inhalation and their influence on pulmonary tuberculosis, 344

Mortality, tuberculosis, in Colorado for the thirteen years, 1908 to 1920, A statistical study of, 445

MYERS, J. A. Studies on the respiratory organs in health and disease. VIII. A method for quickly obtaining the percentage of an individual's theoretical normal vital capacity of the lungs, 161

Nature of tuberculosis of the eye, The 67
Normal vital capacity of the lungs, A method for quickly obtaining the percentage of an individual's theoretical. Studies on the respiratory organs in health and disease. VIII, 161
Nutrition in experimental tuberculosis, Studies on. I. The effect of the fat-soluble A vitamine on tuberculosis of the guinea pig, with especial reference to the value of codliver oil in experimental tuberculosis, 33

Obituary, Christian Saugman, 1864–1923, 373

PEERS, ROBERT A. Corporation care of tuberculous employees: an experiment as carried out in Colfax by a large corporation, 133
PETERSEN, WILLIAM F., AND LEVINSON, S. A. The lipoids and enzymes of the blood in pulmonary tuberculosis, 278
PETROFF, S. A. Immunological studies in tuberculosis, 412
Physical signs, a comparison of X-ray and, in 1000 cases: The X-ray in the diagnosis of pulmonary tuberculosis, 202
Pneumokoniosis, experimental, produced by carborundum inhalation, The relatively early lesions in, and their influence on pulmonary tuberculosis. Studies on the relation of mineral dusts to tuberculosis, III, 344
Pneumothorax, artificial, selective collapse in, So called: a plea for low intrapleural pressures, 291.
POTTENGER, F. M. Some of the more fundamental reactions of the body cells in tuberculosis, 389
Presidential address: The future of tuberculosis work in America, 215
Pressures, intrapleural, low, a plea for: So called selective collapse in artificial pneumothorax, 291
Primary complex in human tuberculosis and its significance, The, 314
—— lower lobe tuberculosis, A case of, with onset of activity immediately after prophylactic typhoid inoculation, 60
Prophylactic typhoid inoculation, A case of primary lower lobe tuberculosis, with onset of activity immediately after, 60
Pulmonary tuberculosis, A clinical study of the gassed ex-soldier with special reference to, 230
—— ——, chronic, A case of diabetes complicating, treated with insulin, 386
—— ——, diagnosis of, The X-ray in the: a comparison of X-ray and physical signs in 1000 cases, 202
—— ——, lipoids and enzymes of the blood in, The, 278
—— ——, Lower lobe, 307
—— ——, miliary, Chronic, of low virulence, 370
—— ——, suspension stability rate of erythrocytes in, The, 264
—— ——, The relatively early lesions in experimental pneumokoniosis produced by carborundum inhalation and their influence on. Studies on the relation of mineral dusts to tuberculosis, III, 344
—— ——, treatment of, Chaulmoogra oil esters in the, 257
Pyopneumothorax, tuberculous, closed, A case of, treated by formaldehyde-glycerine injections with recovery, 62

Rats, tuberculosis in, Experimental, on varied diets, 49
RAY, LEIGHTON W., AND SHIPMAN, JAMES S. Studies on the biochemistry and chemotherapy of tuberculosis. XXV. Tissue changes produced by the action of the lipins of tubercle, grass and colon bacilli, and of liver, 88

Reaction, Wildbolz auto-urine, The: a report of seventy-five cases, 325
Reactions of the body cells in tuberculosis, Some of the more fundamental, 389
REED, CLARENCE C. Studies on the biochemistry and chemotherapy of tuberculosis. XXVI. Fat-splitting ferments in lymphocytes, 105
Relation of mineral dusts to tuberculosis, Studies on the. III. The relatively early lesions in experimental pneumokoniosis produced by carborundum inhalation and their influence on pulmonary tuberculosis, 344
Reserve, alkali, in tuberculosis, The, 193
Respiratory organs in health and disease, Studies on the. VIII. A method for quickly obtaining the percentage of an individual's theoretical normal vital capacity of the lungs, 161
Reticulum of the lung, The. I. Its relation to early tuberculous processes, 141

Sanatoria, tuberculosis, children discharged from, The subsequent history of, 207
SANSUM, W. D. The treatment of severe diabetes complicated by severe tuberculosis with insulin, 375
Saugman, Christian, 1864–1923, 373
Selective collapse, So called, in artificial pneumothorax: a plea for low intrapleural pressures, 291
Severe diabetes complicated by severe tuberculosis, The treatment of, with insulin, 375
SHIPMAN, JAMES S., AND RAY, LEIGHTON W. Studies on the biochemistry and chemotherapy of tuberculosis. XXV. Tissue change produced by the action of the lipins of tubercle, grass and colon bacilli, and of liver, 88
